Cancer friendly Diet

INFORMATION SHEET ...

General note: Cancerous cells multiply faster in an Acid Residue environment; so avoiding Acid Residue foods and moving over to an Alkaline based diet could help to starve cancerous cells.

Please note: if you choose to change your diet, please make the change over a reasonable period of time - suddenly changing your diet can lead to withdrawal symptoms.

Alkaline Residue Products

The following list is products that are considered to be alkaline based

Fresh Fruits			
Apple	Apricot	Avocado	Blackberries
Blackcurrants	Cherries	Cranberries	Currants, raisins
Dates	Figs	Grapes	Lemons

Parsnips	Peppers	Potatoes	Noni juice
Radishes	Sorrel	Soya beans	Spinach
Swede	Turnips	Watercress	

COOKING FOODS

For those who suffer from Liver, Lymph or Kidney Cancer it is important to try and reduce the amount of toxins that the body has to discard.

The longer that you cook food, the more toxins are produced as the food molecular structure is changed. Ideally having a 'raw food' diet is the best, followed by food that is juiced, steamed or cooked in a wok.

Acid Residue Producers

The following list is products that are considered to be acid based and should be avoided.

Fresh Fruits			
Bananas	Grapefruit	Oranges	Plums
Prunes			
Other			
All alcohol	Chocolate, cocoa	Coffee, tea	Fizzy drinks
Eggs	Lack of sleep	Negative emotions	Preservatives, jams etc
Products in vinegar	Salt & condiments	Sauces	Stress
Sugar	Sweets	Tobacco	Vinegar
Vegetables			
Asparagus tips	Brussels sprouts	Chick peas	Dried beans
Lentils	Peanuts	Rhubarb	Tomatoes
